QUESTION: 61
What default ports need to be opened if a company wants to implement and/or administer
RSA SecurID behind a firewall? (Choose two)

A. 5500 UDP
B. 5500 TCP
C. 5510 TCP
D. 5520 UDP
E. 1024 -65535 UDP

Answer: A E

QUESTION: 62
The RSA Credential Manager function allows

A. users to self-register for RSA SecurID tokens.
B. managers to control the deployment of Replica servers.
C. administrators to install software token packages remotely.
D. Agents to determine what credentials are valid for authentication.

Answer: A

QUESTION: 63
RSA Authentication Manager installation on a UNIX platform is similar to installation on
a Linux platform because both platforms require

A. an Enterprise license
B. the installer to run as 'root'
C. internet access to download security patch files
D. the use of a command line console during installation

Answer: B

QUESTION: 64
Planning the installation of RSA Authentication Manager software or an RSA SecurID
Appliance should

A. include planning what Agents are required at network access points.
B. take place after Agent devices and software have been installed and configured.

C. determine how to add the logout time of any authenticated users to the Agent audit log.
D. include how to generate and securely distribute Node Secret values for Agents in the system.

Answer: A

QUESTION: 65
The value of an on-demand tokencode is

A. its ability to be re-used for login up to 5 times before expiration.
B. that it can be supplied to users who have no assigned authenticator.
C. that multiple users can share the same tokencode in an emergency.
D. the added security of a token that only displays a tokencode when activated.

Answer: B

QUESTION: 66
After installation of RSA Authentication Manager software or RSA SecurID Appliance, it is important to ensure

A. the correct UTC time is set in the Server host or Appliance.
B. that Agents and the Server host or Appliance are on the same network subnet.
C. that DHCP is enabled to assign a valid IP address to the Server host or Appliance.
D. the correct sdconf.rec file is moved from any installed Agent to the Server or Appliance.

Answer: A

QUESTION: 67
For what installation situations is creating a 'package' file necessary before installation can begin? (Choose two)

A. for RADIUS client installation
B. for a RADIUS server installation
C. for an Authentication Agent installation
D. for a Replica database server installation
E. for a Primary database server installation

Answer: B D

QUESTION: 68
RSA Authentication Manager software AND the RSA SecurID Appliance BOTH allow the use of a separate, and standalone

A. RADIUS server
B. ORACLE database
C. LDAP user data source
D. Credential Manager server

Answer: C

QUESTION: 69
If an LDAP directory is arranged with the Organizational Units shown in the exhibit, how can two Authentication Manager Realms be structured such that Realm 1 contains the users in ou=B and Realm 2 contains the users in ou=C?

A. Create an Identity Source for all ou=A users in the default SystemDomain realm then move the desired users to Realm 1 and Realm 2.
B. Create an Identity Source for ou=B and associate it with Realm 1; create another Identity Source for ou=C and associate it with Realm 2.
C. Create an Identity Source for all ou=A users, create separate Security Domains for ou=B and ou=C users,
and associate each Security Domain with a realm.
D. Create an Identity Source for ou=A and associate it with both Realm 1 and Realm 2 then filter each realm to include only the desired users for ou=B and ou=C .

Answer: B

QUESTION: 70
In a Primary/Replica environment, administrative changes can be made only on a server in the Primary instance.

A. True
B. False

Answer: A

Which of the following statements is true regarding restriction of user access by time of day?

A. Restricted times can only be set by using an Access Time template.
B. Time restrictions are established according to user group membership.
C. Fractional times zones can be selected for setting allowed access times.
D. Time restrictions are enforced for both restricted and unrestricted Agents.

Answer: B

Special Discount Coupon

Actual Exam Questions: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

Exam Dumps: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

Practice Tests: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

Updated Content: Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

Technical Support: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
