Question: 45

The following nutrition diagnosis is written in what type of format: “Poor glycemic control is related to skipping use of oral hypoglycemic agents as evidenced by random blood glucose levels greater than 200 mg/dl”.

- A. SOAP note
- B. POMR
- C. PES statement
- D. Continuity of care record

Answer: C

The nutrition diagnosis “Poor glycemic control is related to skipping use of oral hypoglycemic agents as evidenced by random blood glucose levels greater than 200 mg/dl” is written as a PES statement (P is problem, E is etiology, S is signs or symptoms). Problem = poor glycemic control, Etiology = skipping use of oral hypoglycemic agents, S = blood glucose levels greater than 200 mg/dl.

Question: 46

The level of sodium restriction recommended for congestive heart failure (CHF):

- A. Depends on the level of cardiac decompensation
- B. Is usually 2-3 grams per day
- C. May range from 100-150 mEq

D. Is dependent on which diuretics are used

Answer: A

The level of sodium restriction recommended for congestive heart failure depends on the level of cardiac decompensation; as cardiac output decreases, the level of sodium restriction becomes stricter. The maximum sodium load tolerated by individuals with acute CHF is usually 1-2 grams a day. One to grams of sodium equals 43 to 87 mEq (milliequivalents).

Question: 47

Which dietary measures are recommended for treating hypercalcuria that is not associated with renal stones?

- A. Limiting calcium to 1000 mg per day
- B. Increasing fluid intake to 2 liters per day
- C. 400 IU vitamin D per day
- D. Limiting animal protein to less than 1.7 g/kg per day

Answer: D

Limiting animal protein to less than 1.7 g/kg per day is recommended for the treatment of hypercalcuria because excessive intakes of animal protein cause calcium loss from the bones. A moderate calcium intake of 600-800 mg of calcium per day is recommended, since lowering calcium intake results in increased absorption. Increasing fluid intake does not prevent hypercalcuria.

Question: 48

The DASH diet is often used to treat:

- A. Diabetes mellitus
- B. Hypertension
- C. Nephritis
- D. Hepatitis

Answer: B

The Dietary Approaches to Stop Hypertension, or DASH, diet was developed to treat hypertension by promoting intake of fruits and vegetables rich in potassium and magnesium, minerals which help lower blood pressure.

Question: 49

A medication which needs to be discontinued in a uremic patient is:

- A. Epogen
- B. Kayexelate
- C. Humulin
- D. Triamterene

Answer: D

A medication which may need to be discontinued in uremia is Triamterene, a potassium-sparing diuretic. Because serum potassium levels are high in uremia, use of potassium-sparing diuretics such as Triamterene is contraindicated. Epogen stimulates red blood cell production, Kayexelate is a potassium-binder, and Humulin is synthetic insulin, all of which may be indicated for use in uremia.

Question: 50

Stomatitis is treated with which of the following dietary interventions?

- A. Supplementation with iron
- B. Clear liquid diet
- C. Avoidance of acidic and spicy foods
- D. A & C

Answer: D

Stomatitis is an inflammation of the mucous membranes of the mouth. It may be caused by iron deficiency, in which case it is treated with iron supplementation. The usual dietary regimen is avoidance of acidic and spicy foods.

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
