Question: 77

“It’s time for Lab Test! The classic game show where you match tubes to tests! I’m your host Kimi Stry! Ok, players ready to pass your Lab Test? The test is uric acid; what's the match?”

- A. SST/Chemistry lab.
- B. Lavender/ Chemistry lab.
- C. Green/Serology.

Answer: A

A blood sample drawn for a uric acid would be drawn in a SST and sent to the chemistry laboratory.

Question: 78

“It’s time for Lab Test! The classic game show where you match tubes to tests! I’m your host Kimi Stry! Ok, players ready to pass your Lab Test? The test is A1C; what’s the match?”

- A. Green/chemistry lab.
- B. Lavender/chemistry lab.
- C. Red / hematology lab.

Answer: B

A blood sample drawn for an A1C (hemoglobin A1C) is drawn in a lavender top tube and sent to the chemistry laboratory.

Question: 79

79. Which of the following phrases describes the pre-analytical phase of laboratory testing?

- A. The phase of laboratory testing that involves phlebotomists
- B. One of two phases necessary for laboratory testing

- C. The phase involving all processes of laboratory testing
- D. All of the above

Answer: B

The pre-analytic phase of laboratory testing is the first of the two phases that cover all processes of laboratory testing. The first phase includes test ordering, specimen collection, and processing of the samples. The second phase is the analytic phase, which includes the actual testing and reporting of results.

Question: 80

Which of the following examples is a pre-analytical variable?

- A. Patient did not maintain the designated fasting period for a fasting sample.
- B. Light sensitive sample not protected from light.
- C. Elevated result not reported immediately
- D. A and B

Answer: D

A patient eating during the fasting period necessary for a fasting specimen and not protecting a light-sensitive specimen from light, are two examples of pre-analytical variables. Pre-analytical variables account for most laboratory errors.

Question: 81

Blood gas samples, gastrin samples, ammonia samples, and lactic acid samples are all blood samples that require which special transportation considerations?

- A. All must be transported in ice water.
- B. All must be transported warmed.
- C. All require protection from light.

Answer: A

Some blood analytes break down quickly; transporting the specimen in ice water slows that process. Other tests that require chilled transportation include renin, catecholamine, and parathyroid.

Question: 82

82. A physician just called Phil the New Phlebotomy Tech's supervisor. The physician was very upset, because he didn't receive a critical lab result. This is an example of what kind of variable?

- A. Pre-analytical
- B. Analytical

Answer: B

Not informing a physician of laboratory results is an analytical variable.

Question: 83

"It's time for Lab Test! The classic game show where you matching tubes to tests! I'm your host Kimi Stry! Ok, players ready to pass your Lab Test? The test is RA; what's the match?"

- A. Red/Hematology
- B. Blue/Chemistry
- C. Red/Serology

Answer: C

Blood drawn for an RA would be drawn in red-topped specimen container and sent to serology.

Question: 84

Labeling a sample at the bedside is an example of which variable control?

- A. Pre-analytic
- B. Analytic

Answer: A

Requiring phlebotomists to label specimens at the bedside to avoid specimen mix-ups and unlabeled specimens is a method of controlling a pre-analytic variable.

Question: 85

85. What is point-of-care testing?

- A. Testing that is done to pinpoint an area of patient care
- B. Testing that is done in the presence of a patient
- C. Testing that can only be done by the patient
- D. None of the above

Answer: B

Point-of-care testing (POCT) is testing that is done in the presence of a patient. POCT can be done by the patient in their own home or by a provider in a care setting, such as a doctor's office or public health event.

Question: 86

The preanalytical testing phase includes all of the following EXCEPT:

- A. Specimen collection
- B. Verifying test results
- C. Specimen labeling
- D. Specimen processing

Answer: B

The preanalytical testing phase includes specimen collection, specimen labeling, and specimen processing, but not verifying test results. The preanalytical phase of specimen testing happens from the time the physician orders the test until the results are delivered to the physician. Verifying test results belongs to the analytical phase of testing and involves a review of the acceptability of test results.

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
