Question: 141

Which technology is used to convert a private IP address to a public IP address to enable communication over the internet?

- A. Domain Name System (DNS)
- B. Network Address Translation (NAT)
- C. Dynamic Host Configuration Protocol (DHCP)
- D. Virtual Local Area Network (VLAN)

Answer: B

Explanation: Network Address Translation (NAT) is used to convert a private IP address to a public IP address to enable communication over the internet. NAT allows multiple devices with private IP addresses to share a single public IP address by translating the private IP addresses to the public IP address when communicating with external networks.

Question: 142

Which protocol is used to securely access and manage network devices remotely?

- A. SSH (Secure Shell)
- B. Telnet (Telecommunication Network)
- C. SNMP (Simple Network Management Protocol)
- D. HTTPS (Hypertext Transfer Protocol Secure)

Answer: A

Explanation: SSH (Secure Shell) is used to securely access and manage network devices remotely. It provides encryption and secure authentication mechanisms to protect the confidentiality and integrity of the remote management session. SSH has largely replaced Telnet, which transmits data in clear text and is considered insecure.

Question: 143

Which network device is used to connect multiple networks and make forwarding decisions based on IP addresses?

- A. Switch
- B. Router
- C. Hub
- D. Firewall

Answer: B

Explanation: A router is used to connect multiple networks and make forwarding decisions based on IP addresses. It operates at the network layer (Layer 3) of the OSI model and uses routing tables to determine the best path for data packets to reach their destination based on IP addresses. Routers enable communication between different networks and facilitate the exchange of data across the internet.

Question: 144

Which protocol is used to automatically assign IP addresses to network devices?

- A. DHCP (Dynamic Host Configuration Protocol)
- B. DNS (Domain Name System)
- C. SNMP (Simple Network Management Protocol)
- D. FTP (File Transfer Protocol)

Answer: A

Explanation: DHCP (Dynamic Host Configuration Protocol) is used to automatically assign IP addresses to network devices. It is a network management protocol that dynamically allocates IP addresses, along with other network configuration parameters such as subnet mask, default gateway, and DNS server addresses, to devices on a network.

Question: 145

Which network component provides a central point for cable connections in a local area network (LAN)?

- A. Router
- B. Switch
- C. Hub
- D. Modem

Answer: C

Explanation: A hub provides a central point for cable connections in a local area network (LAN). It is a basic networking device that operates at the physical layer (Layer 1) of the OSI model and simply broadcasts incoming data packets to all connected devices. Hubs have largely been replaced by switches, which provide better performance and security.

Question: 146

Which network security technology is used to monitor network traffic and detect potential security breaches or attacks?

- A. Intrusion Detection System (IDS)
- B. Virtual Private Network (VPN)
- C. Firewall
- D. Access Control List (ACL)

Answer: A

Explanation: An Intrusion Detection System (IDS) is a network security technology used to monitor network traffic and detect potential security breaches or attacks. It analyzes network packets and compares them against known attack signatures or abnormal behavior patterns. When an intrusion or suspicious activity is detected, the IDS generates alerts or takes proactive actions to mitigate the threat.

Question: 147

What is one of the key drivers of growing security threats in the market?

- A. comprehensive security solutions
- B. security solution fragmentation
- C. increased demand for cybersecurity professionals
- D. hardware with integrated security solution

Answer: B

Question: 148

What feature of the Catalyst 2960-L allows customers to get a small branch or office network running within minutes?

- A. support for Cisco DNA center
- B. on-box web interface for configuration
- C. flexible deployments with Stackwise-160
- D. complete CLI support

Answer: B

Question: 149

What is one typical need of a small branch?

- A. multiple network services integrated into a single device
- B. comprehensive subscription-based services
- C. multiple devices for optimal flexibility
- D. ability for users to access the majority of resources at off-site data storage

Answer: A

Question: 150

What is one advantage of Umbrella branch package?

- A. prevent already-infected devices from connecting to command and control
- B. prevent guest or corporate users from connecting to malicious domains and IP addresses
- C. deploy the branch package on a Cisco ISR4K router in 4 easy steps
- D. no client side configuration required

Answer: B

Question: 151

What is a key feature of the Meraki MV Dashboard?

- A. drag and drop camera feeds to create video walls with up to 16 cameras per layout
- B. bulk configuration changes and software updates
- C. device security and location analytics in a single pane of glass
- D. single pane of glass showing root cause analysis for all connected wireless clients

Answer: A

Question: 152

What is one way that Mx security appliances achieve automatic failover and high availability?

- A. Always on (availability groups)
- B. Redundant gateways (using HSRP)
- C. Warm spare (using VRRP)
- D. Survivable Remote Site Technology (SRST)

Answer: C

Question: 153

What is one challenge commonly facing Express Specialization Networking customers?

- A. shrinking IT budget and resource scarcity
- B. low number of devices connected to the network
- C. do-it-yourself approach to network management
- D. large, highly bureaucratic IT departments

Answer: A

Question: 154

What is the interface used to access the Cisco Meraki Dashboard?

- A. Web browser
- B. Terminal (Mac) or Command Prompt (Windows)
- C. Cisco IOS command line interface (CLI)
- D. Secure Shell (SSH)

Answer: A

Question: 155

Which is a function performed by the dedicated third radio in MR access points?

- A. RF optimization (Auto RF)
- B. WLAN controller
- C. Site survey planning
- D. DHCP addressing

Answer: A

Question: 156

What would be an indicator that a customer could benefit from a Meraki cloud-managed network?

- A. Customer needs modular hardware customization and granular, command-line level interfacing

- B. Customer prefers direct access to on-premises appliances and servers via in-line terminal management
- C. Customer requires end to-end visibility and a network that can be quickly deployed and easily managed by a limited IT staff
- D. Customer seeks to implement a diverse solution of firewalls with 3rd party integration alongside other cloud application.

Answer: C

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
