### Question: 1

Which activity falls under the scope of maintaining and managing an IBM Security Guardium environment?

- A. Configuring network firewalls
- B. Defining data classification rules
- C. Performing database backups
- D. Conducting vulnerability assessments

Answer: C

Explanation: Performing database backups is a maintenance and management activity in an IBM Security Guardium environment, ensuring data integrity and recoverability in case of system failures or data loss.

### Question: 2

Which feature of IBM Security Guardium facilitates the discovery and classification of sensitive data within databases?

- A. Vulnerability assessment
- B. Data activity monitoring
- C. Data classification engine
- D. Access control policies

Answer: C

Explanation: The data classification engine in IBM Security Guardium enables the discovery and classification of sensitive data within databases by analyzing the content and context of the data.

### Question: 3

When assessing and hardening an IBM Security Guardium environment, which action should be performed to ensure the system remains up-to-date with the latest security patches and updates?

- A. Regularly review access control policies
- B. Conduct vulnerability assessments
- C. Update database encryption algorithms
- D. Monitor network bandwidth usage

Answer: B

Explanation: Conducting vulnerability assessments is a key action when assessing and hardening an IBM Security Guardium environment, helping identify vulnerabilities and ensuring the system remains up-to-date with the latest security patches and updates.

#### **Question: 4**

Which of the following is a method used by IBM Security Guardium to protect databases from unauthorized access?

- A. Encryption of database backups
- B. Implementation of firewall rules
- C. Role-based access control
- D. Intrusion detection system

Answer: C

Explanation: IBM Security Guardium utilizes role-based access control to protect databases from unauthorized access by defining and enforcing access privileges based on user roles.

### Question: 5

During the deployment and configuration of an IBM Guardium System, which component is responsible for collecting and analyzing database activity?

- A. Collector
- B. Aggregator
- C. Central Manager
- D. S-TAP

Answer: D

Explanation: The S-TAP (Sniffer-TAP) component is responsible for collecting and analyzing database activity in an IBM Guardium System.

### Question: 6

Which functionality of IBM Security Guardium allows for the generation of reports on database activity and compliance?

- A. Audit logs
- B. Vulnerability scanning
- C. Policy enforcement
- D. Report builder

Answer: D

Explanation: The report builder functionality in IBM Security Guardium enables the generation of reports on database activity and compliance, providing insights into security events and regulatory compliance.

### Question: 7

Which of the following is a key consideration when planning for the deployment of an IBM Security Guardium System?

- A. Network bandwidth requirements
- B. User authentication methods
- C. Operating system compatibility
- D. Database encryption algorithms

Answer: A

Explanation: Planning for the deployment of an IBM Security Guardium System involves considering network bandwidth requirements to ensure efficient data transfer and minimal impact on network performance.

**Question: 8**

When troubleshooting issues with an IBM Security Guardium deployment, which action should be taken to identify and resolve problems?

- A. Monitor database activity logs
- B. Check network bandwidth utilization
- C. Review system audit logs
- D. Perform database backups

Answer: C

Explanation: Reviewing system audit logs is an essential action when troubleshooting issues with an IBM Security Guardium deployment, as it helps identify and resolve problems by analyzing security events and system activities.

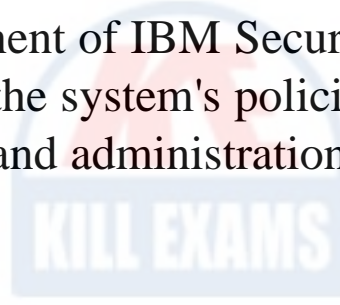

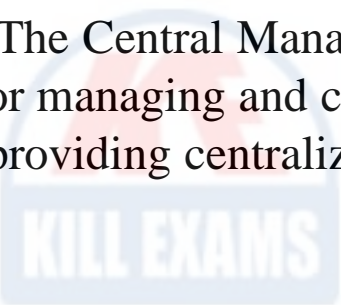

**Question: 9**

Which component of IBM Security Guardium is responsible for managing and configuring the system's policies, collectors, and aggregators?

- A. S-TAP
- B. Central Manager
- C. Event Analyzer
- D. Data Gateway

Answer: B

Explanation: The Central Manager component of IBM Security Guardium is responsible for managing and configuring the system's policies, collectors, and aggregators, providing centralized control and administration.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
