IBM Certified Deployment Professional - Spectrum Protect V8.1.12 (C9002500)

ORDER FULL VERSION

Question: 1

Which component is responsible for managing the Spectrum Protect server database?

A. Configuration Manager
B. Data Mover
C. Operations Center
D. Database Manager

Answer: D

Explanation: The Database Manager is responsible for managing the Spectrum Protect server database. It handles tasks such as creating and maintaining the database, optimizing performance, and ensuring data integrity.

Question: 2

Which IBM Spectrum Protect component provides a centralized web-based interface for monitoring and managing backup and restore operations?

A. Operations Center
B. Administrative Client
C. Backup-Archive client
D. Configuration Manager

Answer: A

Explanation: The Operations Center in IBM Spectrum Protect provides a centralized web-based interface for monitoring and managing backup and restore operations. It offers comprehensive visibility into the backup environment, allowing administrators to monitor client statuses, track storage usage, and perform various administrative tasks.

Question: 3

What is the first step in the planning phase of an IBM Spectrum Protect deployment?

A. Assessing the current environment and data protection requirements
B. Selecting the appropriate hardware for the deployment
C. Designing the backup and restore strategies
D. Defining the retention policies and data retention periods

Answer: A

Explanation: The planning phase of an IBM Spectrum Protect deployment begins with assessing the current environment and understanding the data protection requirements. This step helps in identifying the scope of the deployment and determining the necessary resources and strategies.

Question: 4

What is the purpose of the Spectrum Protect administrative schedules?

A. To define the data retention policies
B. To specify the backup window for clients
C. To manage the movement of backup data between storage pools
D. To schedule maintenance tasks for the Spectrum Protect server

Answer: D

Explanation: The Spectrum Protect administrative schedules are used to schedule maintenance tasks for the Spectrum Protect server. These tasks include database backups, reclamation processes, and other administrative activities necessary for the proper functioning of the server.

Question: 5

When troubleshooting a failed backup operation in Spectrum Protect, which log file should be examined to identify the cause of the failure?

A. dsmserv.log
B. actlog.log
C. devconfig.log
D. dsmsched.log

Answer: B

Explanation: The actlog.log file records the activities and events that occur during backup and restore operations in Spectrum Protect. By examining this log file, administrators can identify the cause of a failed backup operation, including any error messages or warnings encountered.

Question: 6

Which Spectrum Protect component is responsible for client deduplication?

A. Data Mover
B. Backup-Archive client
C. Server-to-Server Communication (S2S)
D. Configuration Manager

Answer: B

Explanation: The Backup-Archive client in Spectrum Protect is responsible for client deduplication. It performs deduplication at the client level, identifying and eliminating duplicate data before sending it to the server for storage. This helps in reducing network bandwidth and storage requirements.

Question: 7

What is the purpose of the Spectrum Protect administrative command line interface (CLI)?

A. To perform backup and restore operations
B. To configure and manage the Spectrum Protect server
C. To troubleshoot and diagnose server issues
D. To monitor the status of client backups

Answer: B

Explanation: The Spectrum Protect administrative command line interface (CLI) is used for configuring and managing the Spectrum Protect server. It provides a set of commands and options to perform administrative tasks such as defining storage pools, setting up client schedules, and managing policies.

Question: 8

What is the purpose of a storage pool in Spectrum Protect?

A. To store backup data on disk or tape
B. To replicate backup data to offsite locations
C. To manage client schedules and backup policies
D. To perform inline data deduplication

Answer: A

Explanation: A storage pool in Spectrum Protect is used to store backup data on disk or tape. It provides a logical grouping of storage devices and manages the allocation and movement of data across different storage media based on defined policies.

Question: 9

Which log file should be examined to troubleshoot client connection issues in Spectrum Protect?

A. dsmserv.log
B. actlog.log
C. devconfig.log
D. dsmerror.log

Answer: D

Explanation: The dsmerror.log file contains error messages related to client connections in Spectrum Protect. By examining this log file, administrators can identify and troubleshoot client connection issues, such as authentication failures or network communication problems.

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

ORDER FULL VERSION
Special Discount Coupon

Actual Exam Questions: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

Exam Dumps: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

Practice Tests: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

Updated Content: Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

Technical Support: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
