IBM API Connect v10.0.3 Solution Implementation

ORDER FULL VERSION

<https://killexams.com/pass4sure/exam-detail/C1000-138>

Question: 1

Which component of IBM API Connect is responsible for enforcing security policies, controlling access to APIs, and managing traffic?

- A. Provider Organization
- B. API Gateway
- C. Developer Portal
- D. DataPower Gateway

Answer: B

Explanation: The API Gateway component of IBM API Connect is responsible for enforcing security policies, controlling access to APIs, and managing traffic. It acts as a mediator between API consumers and backend services, ensuring the security and scalability of API interactions.

Question: 2

What is the primary function of the Developer Portal in IBM API Connect?

- A. To manage organizational policies and access control.
- B. To design and implement APIs.
- C. To provide a self-service platform for API consumers.
- D. To facilitate communication between different programming languages.

Answer: C

Explanation: The primary function of the Developer Portal in IBM API Connect is to provide a self-service platform for API consumers. It enables users to discover, explore, and consume APIs, providing documentation, testing capabilities, and subscription management.

Question: 3

Which component of IBM API Connect is responsible for enforcing security policies, controlling access to APIs, and handling request transformation?

- A. Provider Organization
- B. API Gateway
- C. Developer Portal
- D. DataPower Gateway

Answer: D

Explanation: The DataPower Gateway component of IBM API Connect is responsible for enforcing security policies, controlling access to APIs, and handling request transformation. It acts as a secure gateway between API consumers and backend services, ensuring authentication, authorization, and data transformation capabilities.

Question: 4

Which of the following authentication mechanisms is commonly used in IBM API Connect to secure API requests?

- A. Basic authentication
- B. JWT (JSON Web Tokens)
- C. OAuth 1.0a
- D. SAML (Security Assertion Markup Language)

Answer: B

Explanation: In IBM API Connect, JWT (JSON Web Tokens) is commonly

used as an authentication mechanism to secure API requests. JWT is an open standard that defines a compact and self-contained way for securely transmitting information between parties as a JSON object.

Question: 5

What is the primary function of the Developer Portal Administrator in IBM API Connect?

- A. Designing and implementing APIs.
- B. Managing API subscriptions and access control.
- C. Configuring and customizing the Developer Portal.
- D. Defining and managing organizational policies.

Answer: C

Explanation: The primary function of the Developer Portal Administrator in IBM API Connect is to configure and customize the Developer Portal. They manage user registrations, content, and appearance of the portal to provide an optimal experience for API consumers.

Question: 6

Which role in IBM API Connect is responsible for defining and managing the overall configuration and setup of the API Connect solution?

- A. Provider Organization Owner
- B. API Developer
- C. API Product Manager
- D. Developer Portal Administrator

Answer: A

Explanation: The Provider Organization Owner role in IBM API Connect is responsible for defining and managing the overall configuration and setup of the API Connect solution. They have administrative privileges and control the organizational structure, policies, and access control within API Connect.
