Question: 26

Which autoimmune condition is characterized by the body producing autoantibodies that attack muscle receptor sites, reducing the ability to receive neurotransmitter signals to move properly, thus causing weakness?

- A. Myasthenia gravis
- B. Muscular dystrophy
- C. Muscular degenerative disorder
- D. None of the above

Answer: A

Myasthenia gravis is characterized by the body producing autoantibodies that attack muscle receptor sites of the neurotransmitter acetylcholine, causing an inability to properly pick up signals to function, thus causing weakness.

Question: 27

You are caring for an adult patient who is suspected to have upper neuronal damage. You look for the Babinski sign by stroking the sole of the foot. What would you expect to see?

- A. All toes curl inward
- B. No response
- C. Big toe extends up and the rest fan out
- D. All toes curl upward

Answer: C

In a patient who has upper neuronal damage, a positive Babinski sign is present when the big toe extends and the rest of the toes fan out while the sole of the foot is stroked. A normal or negative sign would be for all toes to curl inward. In children under 2 years of age, the sign is present as the neurologic system matures.

Question: 28

Which of the following are responsible for direct gas exchange with the alveoli?

- A. Veins
- B. Arteries
- C. Capillaries
- D. None of the above

Answer: C

The smallest and thinnest part of the circulation system is the capillaries. The thin nature of capillaries allows the gas exchange with alveoli to occur.

Question: 29

When there is inadequate blood supply to the heart, a patient may experience pain called:

- A. CVA
- B. TIA
- C. Angina
- D. IVC

Answer: C

An inadequate supply of blood to the heart can cause a patient to experience a chest pain called angina. When angina occurs, providers can administer drugs like nitroglycerin, which acts as a vasodilator, enlarging the arteries of the heart to allow for additional blood to flow through them.

Question: 30

Disorders of the nervous system that occur as a result of a cancer or tumor in a different area of the body are known as:

- A. Comorbidity
- B. Secondary neurological disorder
- C. Neuritis
- D. Paraneoplastic syndrome

Answer: D

Some tumors cause an immune response in which the body produces anti-bodies to attack. These anti-bodies often not only attack the tumor, but also attack a portion of the nervous system not related to the tumor. The conditions that result are known as paraneoplastic syndrome and can cause difficulty when diagnosing cancers, as the symptoms are not necessarily located where the tumor is.

SAMPLE QUESTIONS

These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

<u>Actual Exam Questions</u>: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

Exam Dumps: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

<u>Practice Tests</u>: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

<u>Guaranteed Success</u>: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

<u>Updated Content:</u> Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

<u>Technical Support</u>: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
