Question: 137

A company has a wireless network that contains a cluster of four Aruba 7030 Mobility Controllers (MC) managed by a Mobility Master (MM) located in the data center. The company has Aps deployed that are nearing the capacity of the cluster. The administrator wants to increase AP capacity. How can the administrator solve the problem?

- A. Add a new controller to the Mobility Master.**
- B. Add a Virtual Mobility Controller to the existing cluster.**
- C. Add a 7030 controller to the existing cluster.**
- D. Add a 7220 controller to the existing cluster.**

Answer: B

Question: 138

An Administrator supports a group of employees that connect to the corporate office using the VIA client. An Aruba Mobility Controller (MC), behind a corporate firewall, terminates the user's VPN sessions. The VPN sessions fail to establish because of the existing firewall rules.

Which connections must the administrator allow on the firewall? (Choose three.)

- A. UDP 8202**
- B. UDP 4500**
- C. UDP 8211**
- D. TCP 4443**
- E. TCP 443**
- F. UDP 500**

Answer: ABE

Question: 139

Refer to the exhibit.

```
hostname "swdi-3810-2"
module 1 type j1073x
console idle-timeout 600
console serial-usb 600
ip routing
tunneled-node-server
  controller-ip 10.1.20.100
  exit
interface 1
  disable
  exit
interface 20
  name "Wireless Client NIC"
  tunneled-node-server
  exit
interface 21
  disable
  tunneled-node-server
  exit
vlan 23
  name "VLAN23"
  untagged 20-21
  no ip address
  exit
```

What is true about the configuration shown in the exhibit?

- A. This is an ArubaOS-Switch configured for per-user tunneled node.
- B. This is an ArubaOS controller configured for per-user tunneled node.
- C. This is an ArubaOS-Switch configured for per-port tunneled node.
- D. This is an ArubaOS controller configured for per-user tunneled node.

Answer: C

Question: 140

Which license type must an administrator purchase to use Spectrum Monitoring?

- A. RFP
- B. VMC
- C. PEFV
- D. PEFNG

Answer: A

Reference: <http://community.arubanetworks.com/t5/Wireless-Access/license-requirements-air-monitor-spectrum-monitor/td-p/243832>

Question: 141

A company opens a new branch office and a RAP is used to connect to a corporate office Aruba Mobility Controller (MC). The company needs to provide connectivity to the office across the street. There is an AP across the street. However, there is no wired connectivity between the buildings. Which actions can the administrator select to provide the required connectivity? (Choose two.)

- A. Provision all Aps at the branch office as Mesh Points.**
- B. Provision all Aps at the branch offices as Mash Portals.**
- C. Implement one of the Aps as a Mesh Point.**
- D. Provision the RAP as a Mesh Portal.**
- E. Implement two mesh clusters.**

Answer: AD

### Question: 142

A customer uses an SIP application that is not supported by Aruba United Communications and Collaboration (UCC). Which voice deployment mode should the administrator implement on Aruba Mobility Controllers (MCs) to support this application?

- A. Heuristic mode**
- B. SDN-API mode**
- C. QoS-mode**
- D. WMM-only mode**

Answer: A

### Question: 143

An administrator implements a ClearPass solution to authenticate Aruba wireless users. The Aruba wireless solution is an ArubaOS 8.x Mobility Master (MM) deployment. ClearPass sends an Aruba VSA role name for an authenticated user. However, the administrator notices that the role assigned to the user is different from the one assigned by the ClearPass server.

Which two items should the administrator verify that might be the cause of this problem? (Choose two.)

- A. Enablement of user roles on the controller**
- B. Spelling of the role on the ClearPass server**
- C. Server-derived role assignment on the ClearPass server**
- D. Role existence on the Managed Network**
- E. Order assignment that the controller uses to select a user role**

Answer: BD

### Question: 144

An administrator has a cluster of Aruba Mobility Controllers (MCs). The administrator wants to manually reboot one of the controllers. Before rebooting, which command should the administrator use to move the APs?

- A. apmove**
- B. lc-cluster move ap**
- C. active-ap-rebalance**
- D. active-ap-lb**

Answer: B

### Question: 145

Which Aruba Unified Communications and Collaboration (UCC) deployment mode should be used when UCC is disabled on the Mobility Controllers

(MCs)?

- A. Heuristics mode**
- B. WMM mode**
- C. ALG mode**
- D. SDN-API mode**

Answer: B

Question: 146

An administrator supports a cluster of four Aruba Mobility Controllers (MCs) with management addresses of 10.1.100.101, 10.1.100.102, 10.1.100.103, and 10.1.202.181. The administrator accesses an AP associated with this cluster, reboots it and accesses apboot mode. The administrator executes the printenv command. Which AP parameter contains the IP addresses of the cluster members that the AP should use to connect to the cluster?

- A. Nodelist**
- B. Servername**
- C. Master\_ip**
- D. Cfg\_lms**

Answer: A

QUESTIO

Question: 147

A VIA client tries to initially connect to corporate office controller through an intermediate firewall. However, the VPN connection fails. The administrator examines the firewall rules and determines that rules for UDP 4500 and UDP 500 are configured. Which additional protocol must be allowed in the firewall rules to resolve this connection failure?

- A. TCP 22**
- B. TCP 443**
- C. UDP 8200**
- D. ESP**

Answer: D

Question: 148

Refer to the exhibit.

Last synchronization time: Thu Apr 13 07:42:48 2017  
To Master Switch at 10.254.10.101: succeeded  
WMS Database backup file size: 39121 bytes  
Local User Database backup file size: 29694 bytes  
Global AP Database backup file size: 13375 bytes  
IAP Database backup file size: 3750 bytes  
Airgroup Database backup file size: 3052 bytes  
License Database backup file size: 5358 bytes  
CPSec Database backup file size: 3224 bytes  
Bocmgr Database backup file size: 6016 bytes  
Synchronization took 1 second

1 synchronization attempted  
0 synchronization have failed  
Periodic synchronization is enabled and runs every 60 minutes  
Synchronization doesn't include Captive Portal Custom data  
Airmatch database gets synchronized periodically. Last synchronization time:  
2017-04-13 07:22:2019:20:24

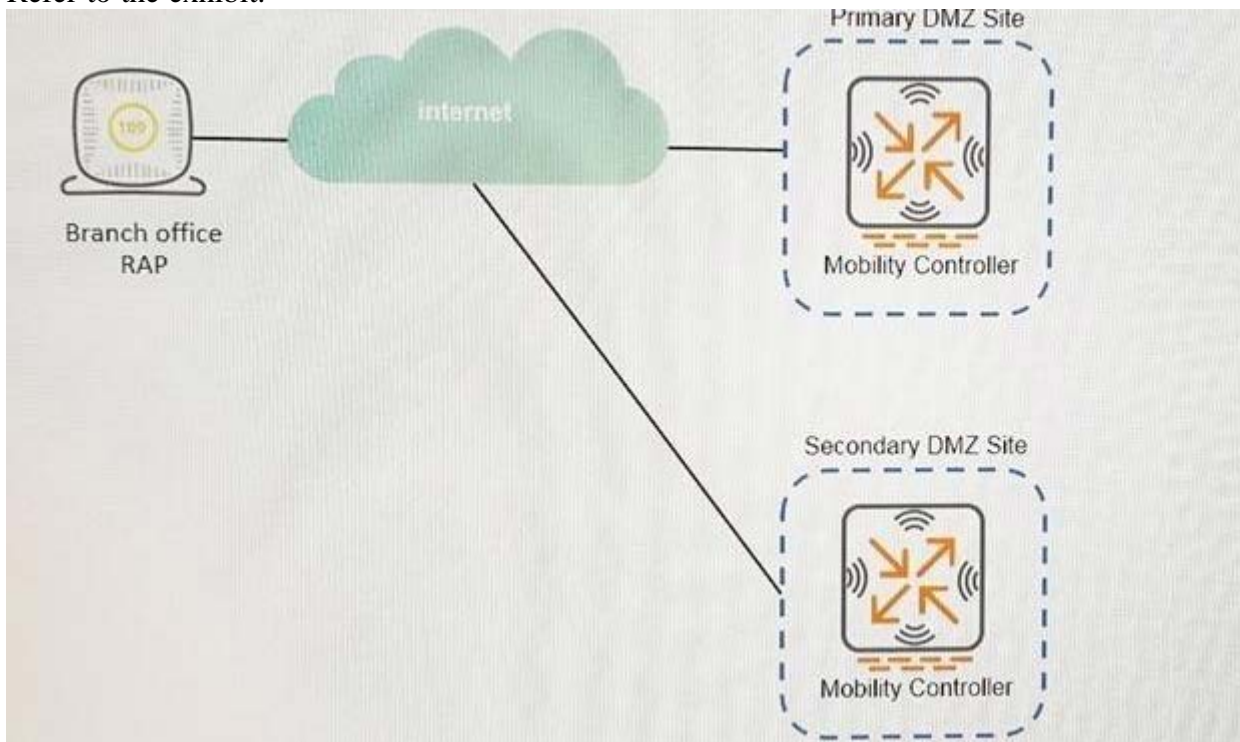

What can be determined from the command output shown in the exhibit?

- A. The synchronized data is protected by VRRP.
- B. The command was executed on the standby Mobility Master (MM).
- C. The synchronization period is at its default value.
- D. The other Mobility Master (MM) is the active license server.

Answer: D

Question: 149

Refer to the exhibit.

An administrator supports a RAP at a branch office shown in the exhibit. The company has one Mobility Controller (MC) at the Primary DMZ site and one at the Secondary DMZ site. The RAP is configured to connect to only the MC at the Primary DMZ site. A network outage with the ISP at the

Primary DMZ site causes the RAP to reboot. Upon reboot, the RAP cannot build a tunnel to the Secondary DMZ site MC because the administrator forgot to add the Second LMS IP address to the AP Group configuration. Once the RAP can successfully connect, the administrator can add the Secondary DMZ MC as a backup LMS to fix the AP Group.

What should the administrator implement to allow the RAP to connect to the MC at the Secondary DMZ site while the outage at the primary site persists?

- A. Dynamic discovery through DHCP Option 43**
- B. Static configuration from apboot mode**
- C. Dynamic discovery through DHCP Option 60**
- D. Dynamic discovery through multicast ADP**

Answer: A

Question: 150

An administrator adds local administrative accounts to manage the Aruba Mobility Controllers (MCs). Which role should be assigned to an administrator who needs to only generate reports and monitor WLANS and ports?

- A. Location-api-management**
- B. Network-operations**
- C. Root**
- D. AP-provisioning**

Answer: B

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
