A company provides cable-based Internet and television services. Supply cables often must be buried on customers’ properties. When a supply cable must be buried, the company hires one vendor to locate any existing underground utilities and another vendor to bury the supply cable. These vendors manage their own resources in their own scheduling systems. You need to create bookable resources to ensure that you can schedule these vendors from within your Microsoft Dynamics 365 implementation. Which resource type should you use?

A. crew  
B. account  
C. service center  
D. user  

**Answer:** B
