You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10
- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1. Which devices will apply Policy1?

A. Device1, Device2, Device4, and Device5
B. Device1, Device4, and Device5 only
C. Device4 and Device5 only
D. Device1, Device3, Device4 and Device5

Answer: A

Explanation:
Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.
Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.
Incorrect answers:
B: Policy1 applies to Device2 as Policy1 is assigned to Group2.
C: Policy1 applies to Device1 as Policy1 is assigned to Group1. Policy1 also applies to Device2 as Policy1 is assigned to Group2.
D: Device3 is a member of Group3 only. Policy1 is not assigned to Group3.
