Microsoft 365 Mobility and Security

http://killexams.com/pass4sure/exam-detail/MS-101
Question: 140

You configure a conditional access policy. The locations settings are configured as shown in the Locations exhibit. (Click the Locations tab.)

The users and groups settings are configured as shown in the Users and Groups exhibit. (Click Users and Groups tab.)
Members of the Security reader group report that they cannot sign in to Microsoft Active Directory (Azure AD) on their device while they are in the office. You need to ensure that the members of the Security reader group can sign in to Azure AD on their device while they are in the office. The solution must use the principle of least privilege. What should you do
A. From the conditional access policy, configure the device state.
B. From the Azure Active Directory admin center, create a custom control.
C. From the Device Management admin center, create a device compliance policy.
D. From the Azure Active Directory admin center, create a named location.

Answer: D

Question: 141

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You have a Microsoft 365 subscription. You need to ensure that users can manage the configuration settings for all the Windows 10 devices in your organization. What should you configure:
A. the Enrollment restrictions
B. the mobile device management (MDM) authority
C. the Exchange on-premises access settings
D. the Windows enrollment settings

Answer: B

References: https://docs.microsoft.com/en-us/intune/mdm-authority-set

Question: 142

You have a Microsoft 365 tenant. All users are assigned the Enterprise Mobility + Security license. You need to ensure that when users join their device to Microsoft Azure Active Directory (Azure AD), the device is enrolled in Microsoft Intune automatically. What should you configure:
A. Enrollment restrictions from the Device Management admin center
B. device enrollment managers from the Device Management admin center
C. MAM User scope from the Azure Active Directory admin center

Answer:

References: https://docs.microsoft.com/en-us/intune/mdm-authority-set

Question: 142
D. MDM User scope from the Azure Active Directory admin center

Answer: D

References: https://docs.microsoft.com/en-us/intune/windows-enroll

Question: 143

Your company uses Microsoft System Center Configuration Manager (Current Branch) and Microsoft Intune to co-manage devices.
Which two actions can be performed only from Intune Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Deploy applications to Windows 10 devices.
B. Deploy VPN profiles to iOS devices.
C. Deploy VPN profiles to Windows 10 devices.
D. Publish applications to Android devices.

Answer: BD

Question: 144

You have Windows 10 Pro devices that are joined to an Active Directory domain.
You plan to create a Microsoft 365 tenant and to upgrade the devices to Windows 10 Enterprise.
You are evaluating whether to deploy Windows Hello for Business for SSO to Microsoft 365 services.
What are two prerequisites of the deployment Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. computers that have biometric hardware features
B. Microsoft Intune enrollment
C. Microsoft Azure Active Directory (Azure AD)
D. smartcards
E. TPM-enabled devices

Answer: BC

Question: 145

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).
You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).
You configure pilot co-management.
You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.
You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.
Solution: You unjoin Device1 from the Active Directory domain.
Does this meet the goal
A. Yes
B. No

Answer: B
Question: 146

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).
You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).
You configure pilot co-management.
You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.
You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.
Solution: You add Device1 to an Active Directory group.
Does this meet the goal
A. Yes
B. No

Answer: A

Question: 147

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are deploying Microsoft Intune.
You successfully enroll Windows 10 devices in Intune.
When you try to enroll an iOS device in Intune, you get an error. You need to ensure that you can enroll the iOS device in Intune.
Solution: You create an Apple Configurator enrollment profile.
Does this meet the goal
A. Yes
B. No

Answer: B

Question: 148

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You configure pilot co-management.
You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.
You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.
Solution: You create a device configuration profile from the Device Management admin center.
Does this meet the goal
A. Yes
B. No

Answer: B
Question: 149

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are deploying Microsoft Intune.
You successfully enroll Windows 10 devices in Intune.
When you try to enroll an iOS device in Intune, you get an error.
You need to ensure that you can enroll the iOS device in Intune.
Solution: You add your user account as a device enrollment manager.
Does this meet the goal
A. Yes
B. No

Answer: B

Question: 150

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are deploying Microsoft Intune.
You successfully enroll Windows 10 devices in Intune.
When you try to enroll an iOS device in Intune, you get an error. You need to ensure that you can enroll the iOS device in Intune.
Solution: You configure the Apple MDM Push certificate.
Does this meet the goal
A. Yes
B. No

Answer: A
