QUESTION 4
DRAG DROP

Your company has 5,000 Microsoft Exchange Server 2019 mailboxes.

The company is implementing a new application named HR1 that integrates with Exchange. HR1 runs on a server named HRSERVER.

You create a new mailbox named HRService for the service account of HR1.

You need to ensure that HR1 can sync contacts from all the mailboxes in the Exchange organization concurrently by using an Exchange ActiveSync connection.

How should you complete the PowerShell script? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer:

QUESTION 5
DRAG DROP

Your company named ADatum Corporation has a Microsoft 365 subscription.

ADatum acquires a company named Contoso, Ltd.

In the subscription, you create a new mailbox for each user at Contoso.

You need to provide the Contoso users with a global address list (GAL) that contains only their email addresses.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:
**QUESTION 6**

**DRAG DROP**

You have a Microsoft Exchange Server 2019 organization.

All recipients have SMTP address in the `<alias>@adatum.com` format.

You purchase a new domain named contoso.com

You need to configure all the recipients to have a primary SMTP address in the `<alias>@contoso.com` format as soon as possible.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Select and Place:**

QUESTION 7
Your company has a Microsoft Exchange Server 2019 server. The company has five departments. The server contains one mailbox database for each department. Each mailbox database contains all the users in its respective department. The databases contain 1,000 users.

You create an address book policy (BPA) for each department.

You need to assign the BPAs to the users.

Which cmdlet should you run?

A. Set-Mailbox
B. Set-AddressBookPolicy
C. Set-AddressList
D. Set-MailboxDatabase

Answer: A

QUESTION 8
Your company has a Microsoft Exchange Server 2019 organization.

The company has 10,000 mailboxes. Each department at the company has 1,000 mailboxes.

You need to ensure that when users query the global address list (GAL), they can view only the list of the users in their department.

What should you create?

A. One GAL, 10 offline address books (OABs), 10 address lists, 10 address policies (ABPs), and one email address policy
B. 10 GALs, 10 offline address books (OABs), 10 address lists, 10 room lists, and 10 address book policies (ABPs)
C. One GAL, 10 offline address books (OABs), 10 address lists, 10 room lists, and one address book policy (ABP)
D. 10 GALs, 10 offline address books (OABs), 10 address lists, and 10 email address policies

Answer: B

QUESTION 9
You have a Microsoft Exchange Server 2019 organization.

Users access their email by using Microsoft Outlook 2019.
The users report that when a mailbox is provisioned for a new user, there is a delay of many hours before the new user appears in the global address list (GAL). From Outlook on the web, the users can see the new user in the GAL immediately.

You need to reduce the amount of time it takes for new users to appear in the GAL in Outlook 2019.

What should you do?

A. Modify the default email address policy.
B. Create an address book policy (ABP).
C. Create a scheduled task that runs the Update-GlobalAddressList cmdlet.
D. Modify the offline address (OAB) schedule.

Answer: D
