## Question: 1

Which of the following is a benefit of integrating IBM Engineering Requirements Management - DOORS Next v7.x with a test management tool?

- A. Improved traceability between requirements and test cases
- B. Enhanced version control for requirements
- C. Streamlined collaboration on requirements
- D. Automated generation of requirements documentation

Answer: A

Explanation: Integrating DOORS Next v7.x with a test management tool helps establish improved traceability between requirements and test cases. It allows you to link requirements to specific test cases, ensuring that all requirements are adequately tested and providing a comprehensive view of the coverage between requirements and test artifacts.

## Question: 2

In DOORS Next v7.x, what is the primary purpose of generating requirement reports?

- A. To communicate requirements to stakeholders
- B. To automatically validate requirements against predefined criteria
- C. To enforce version control for requirements
- D. To facilitate collaboration among requirements analysts

Answer: A

Explanation: Generating requirement reports in DOORS Next v7.x serves the primary purpose of communicating requirements to stakeholders. Reports provide a structured and organized view of the requirements, making it easier

for stakeholders to understand and provide feedback. They can be customized to include relevant information, such as requirement details, traceability, and status, based on stakeholders' specific needs.

### **Question: 3**

In DOORS Next v7.x, what is the purpose of capturing relationships between requirements?

- A. To establish a hierarchy of requirements
- B. To track changes made to requirements
- C. To identify dependencies between requirements
- D. To generate automated test scripts

Answer: C

Explanation: Capturing relationships between requirements in DOORS Next v7.x allows you to establish and visualize dependencies between requirements. This helps in understanding the impact of changes made to one requirement on other related requirements and ensures consistency and traceability throughout the requirements management process.

### **Question: 4**

Which of the following integrations is supported by IBM Engineering Requirements Management - DOORS Next v7.x?

- A. Microsoft Excel
- B. Adobe Photoshop
- C. Salesforce CRM
- D. Oracle Database

Answer: A

Explanation: DOORS Next v7.x supports integration with Microsoft Excel, allowing you to import and export requirements data between DOORS Next and Excel spreadsheets. This integration facilitates data exchange and collaboration with stakeholders who prefer to work with Excel for certain tasks.

**Question: 5**

Which of the following analysis techniques can be used in DOORS Next v7.x to identify missing or inconsistent requirements?

- A. Gap Analysis
- B. Risk Analysis
- C. Impact Analysis
- D. Cost-Benefit Analysis

Answer: A

Explanation: Gap analysis in DOORS Next v7.x is a technique used to identify missing or inconsistent requirements by comparing the existing set of requirements against a predefined set of criteria or standards. It helps in identifying gaps or discrepancies between the desired state and the current state of requirements.

**Question: 6**

Which of the following collaboration features in IBM Engineering Requirements Management - DOORS Next v7.x allows multiple stakeholders to review and provide feedback on requirements?

- A. Change Management
- B. Review Workflow
- C. Version Control

## D. Traceability Matrix

Answer: B

Explanation: The Review Workflow feature in DOORS Next v7.x enables multiple stakeholders to collaborate on requirements by providing feedback, suggesting changes, and approving or rejecting requirements. It streamlines the review process and ensures that all stakeholders have a chance to contribute their input.

### Question: 7

In DOORS Next v7.x, what is the purpose of requirements reuse?

- A. To reduce the effort and time required to gather requirements
- B. To eliminate the need for requirements documentation
- C. To increase the complexity of the requirements management process
- D. To improve collaboration among stakeholders

Answer: A

Explanation: Requirements reuse in DOORS Next v7.x involves reusing existing requirements or requirement components to reduce the effort and time required to gather new requirements. It allows you to leverage previously defined and validated requirements, saving resources and promoting consistency across projects.

### Question: 8

Which of the following techniques is used to gather requirements by directly observing users in their working environment?

- A. Interviews

- B. Surveys
- C. Job Shadowing
- D. Brainstorming

Answer: C

Explanation: Job shadowing involves observing users in their working environment to gain a deeper understanding of their requirements, workflows, and challenges. It allows requirements analysts to directly observe how users perform their tasks and identify their needs and pain points.

**Question: 9**

Which of the following options best describes the purpose of a requirements traceability matrix?

- A. To identify potential risks associated with requirements
- B. To track changes made to requirements over time
- C. To establish relationships between requirements
- D. To provide a visual representation of requirement dependencies

Answer: C

Explanation: A requirements traceability matrix in DOORS Next v7.x is used to establish and visualize relationships between requirements. It helps in understanding the dependencies and associations between different requirements, enabling effective impact analysis and ensuring comprehensive coverage of requirements throughout the development lifecycle.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
