IBM Cloud Pak for Data V4.7 Architect

ORDER FULL VERSION

<https://killexams.com/pass4sure/exam-detail/C1000-173>

Question: 1

Which data source service in IBM Cloud Pak for Data is used for ingesting and integrating data from various sources?

- A. Watson Studio
- B. Watson Knowledge Catalog
- C. Watson OpenScale
- D. DataStage

Answer: D

Explanation: DataStage is a data source service in IBM Cloud Pak for Data that is used for ingesting, transforming, and integrating data from various sources. It provides capabilities for data integration and ETL (Extract, Transform, Load) processes.

Question: 2

Which security requirement is NOT necessary when architecting with AI services in IBM Cloud Pak for Data?

- A. Data encryption at rest and in transit
- B. Fine-grained access control for data and AI models
- C. Multi-factor authentication for user access
- D. No security requirements for AI services

Answer: D

Explanation: Architecting with AI services in IBM Cloud Pak for Data requires various security measures, such as data encryption, access control, and multi-factor authentication. There are security requirements for AI services to ensure the confidentiality, integrity, and availability of the data and models.

Question: 3

Which security measure is essential when architecting with analytic services in IBM Cloud Pak for Data?

- A. Encryption of AI models
- B. Secure data masking
- C. Role-based access control
- D. Single-factor authentication

Answer: C

Explanation: Architecting with analytic services in IBM Cloud Pak for Data requires role-based access control to ensure that users have appropriate access privileges based on their roles and responsibilities. Encryption of AI models, secure data masking, and multi-factor authentication are also important security measures, but role-based access control is specifically related to controlling access to the services.

Question: 4

Which data governance service in IBM Cloud Pak for Data is used for managing data quality and data lineage?

- A. Watson OpenScale
- B. Watson Knowledge Catalog
- C. Watson Assistant
- D. Watson Machine Learning

Answer: B

Explanation: Watson Knowledge Catalog is a data governance service in IBM

Cloud Pak for Data that enables data stewards to manage data quality, data lineage, and data discovery. It provides a centralized catalog for organizing and curating data assets.

Question: 5

Which of the following is NOT a step in planning for a Cloud Pak for Data implementation?

- A. Identifying the business requirements and use cases
- B. Assessing the existing IT infrastructure
- C. Defining the security requirements
- D. Building the AI models

Answer: D

Explanation: Planning for a Cloud Pak for Data implementation involves identifying the business requirements and use cases, assessing the existing IT infrastructure, and defining the security requirements. Building AI models is part of the implementation phase, not the planning phase.

Question: 6

Which AI service in IBM Cloud Pak for Data is used for monitoring and explainability of AI models?

- A. Watson Studio
- B. Watson OpenScale
- C. Watson Knowledge Catalog
- D. Watson Machine Learning

Answer: B

Explanation: Watson OpenScale is an AI service in IBM Cloud Pak for Data that provides monitoring, explainability, and bias detection capabilities for AI models. It helps in ensuring the fairness, transparency, and compliance of AI models.

Question: 7

When planning for a Cloud Pak for Data implementation, which factor should NOT be considered?

- A. Scalability requirements
- B. Performance requirements
- C. Data privacy regulations
- D. Marketing strategies

Answer: D

Explanation: When planning for a Cloud Pak for Data implementation, factors such as scalability requirements, performance requirements, and data privacy regulations should be considered. Marketing strategies are not directly related to the technical planning of the implementation.

Question: 8

Which analytic service in IBM Cloud Pak for Data is used for model deployment and scoring?

- A. Watson Studio
- B. Watson OpenScale
- C. Watson Knowledge Catalog
- D. Watson Machine Learning

Answer: D

Explanation: Watson Machine Learning is an analytic service in IBM Cloud Pak for Data that is specifically designed for model deployment and scoring. It provides capabilities for deploying trained machine learning models and making predictions using those models.

Question: 9

Which analytic service is suitable for performing exploratory data analysis and visualizations in IBM Cloud Pak for Data?

- A. Watson Studio
- B. Watson Knowledge Catalog
- C. Watson OpenScale
- D. Watson Machine Learning

Answer: A

Explanation: Watson Studio is an analytic service in IBM Cloud Pak for Data that provides a collaborative environment for data scientists and analysts to perform exploratory data analysis, create visualizations, and develop machine learning models.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
