Question: 134

What does anti-signal indicate in KPI Signals?

- A. No signal has been detected
- B. Long-term stability
- C. Abnormal variation in the scores of a KPI
- D. A workflow has changed

Answer: B

Explanation:

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/par-for-workspace/concept/signal-no-signal-anti-signal.html>

Question: 135

Which of the following are suggested when you type in a query on Analytics Q&A? (Choose three.)

- A. Recent searches
- B. Tables and columns
- C. Breakdowns
- D. Indicators

Answer: A,B,D

Explanation:

When you use Analytics Q&A, the suggestions from previous searches are now shown together with the suggested indicators, tables, and columns.

As you type in a query, Analytics Q&A suggests recent searches, indicators, tables, and columns that match what you have typed so far. Only the tables and columns to which you have access are shown.

If Analytics Q&A cannot determine which table you want, it shows you up to three likely tables.

Question: 136

What role is required to create personal targets and thresholds for users who can view an indicator on the Analytics Hub?

- A. pa_viewer
- B. pa_target_admin
- C. pa_threshold_admin
- D. No role

Answer: D

Explanation:

On the Analytics Hub, no roles are required to create personal targets and thresholds.

A threshold or a target can be personal or global.

A personal threshold or target is visible only to the user that created it.

A personal threshold appears as a light grey dotted line. A personal target appears as a dark line.

Personal thresholds and targets appear only on the Analytics Hub and KPI Details but not on widgets.

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/performance-analytics/concept/pa-targets-thresholds.html>

Question: 137

Which of the following can you do when you set a target for an indicator on the Analytics Hub? (Choose three.)

- A. Set the improvement as a percentage.
- B. Set a review date on which to consider updating the target.
- C. Set the threshold as an improvement on the average score.
- D. Set a start date in the future.

Answer: A,B,D

Explanation:

You can set target values for indicators. When you set a target for an indicator on the Analytics Hub, you can now do the following:

- * Set a start date in the future.
- * Set a review date on which to consider updating the target.
- * Set the target as an improvement on the average score or on the previous target. You can set the improvement as a percentage.

You can have the targets apply only to specific breakdown elements and time series. The target starts to apply at a selected date and continues to apply until you set the next target. However, you can set a review date on which to reconsider the target.

Question: 138

How do you create and associate breakdowns on the breakdown source form?

- A. By selecting the 'New' button on the 'Breakdowns' related list
- B. From the 'Additional actions' menu
- C. From the 'Create Breakdowns' related link
- D. By adding multiple 'Facts tables' under the Source tab

Answer: A

Explanation:

A breakdown source is defined as a set of records from a table or database view or as a bucket group. Multiple breakdowns can use the same breakdown source.

Breakdown sources specify which unique values, called breakdown elements, a breakdown contains.

Breakdown source records have a related list that lists the breakdowns that are based on that source. You can create a breakdown by selecting the "New" button while in this list. The list works like the Indicators list on indicator source records.

Other options in this question do not exist on the breakdown source form.

After you create breakdowns that use this source, these breakdowns are listed in the Breakdowns tab.

Question: 139

How does KPI Signals support notifications?

- A. By forwarding email notifications
- B. By automated signal detection jobs
- C. Through regular back-ups
- D. By setting auto-reply responses

Answer: B

Explanation:

To support notifications, the KPI Signals application provides automated signal detection jobs. For formula indicators, you can modify the jobs to line up with the data collection jobs for the contributing indicators.

The KPI Signals application includes jobs that detect signals automatically. These jobs run so responsible users can be notified of new signals without opening the application. The job for signals on formula indicators requires scheduling.

When you view an indicator in KPI Details and open the KPI Signals panel, that indicator is checked for signals. You, therefore, always have the most up-to-date signals. However, the KPI Signals application also has automated signal detection jobs. These jobs send notifications about signals to subscribed users without them having the application open.

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/par-for-workspace/concept/administering-kpi-signals-jobs.html#administering-kpi-signals-jobs&version=quebec>

Question: 140

What is an easy way for a responsible user to get real-time updates on the signals for a particular KPI?

- A. Monitoring the signal score on a dashboard
- B. Receive email notifications
- C. Schedule a report for the signal data
- D. Manually check the KPI doe signals

Answer: B

Explanation:

As a responsible user, you can receive email notifications about new or unresolved signals, anti-signals, or any actions taken on signals.

You can configure how frequently you get these reminders and the maximum number of reminders to get for a signal.

You no longer have to open KPI Signals and manually check each KPI for signals. Scheduling a report for the signal data does not provide real-time updates. Manually check the KPI for signals and monitoring the signal score on a dashboard requires the user to constantly check for the updates without a pause, which is not easy.

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/par-for-workspace/concept/kpi-signals-responsible-users.html>

Question: 141

How should an admin activate the KPI Signals?

- A. Raise a ServiceNow Support (HI) request
- B. Request from the ServiceNow Store
- C. It is active by default
- D. Activate the sn-kpi-signals plugin

Answer: C

Explanation:

You no longer have to activate the KPI Signals (com.snc.pa.kpi_signals) plugin. It is active by default.

If you do not want this feature, request a Now Platform administrator to set the property com.snc.pa.activate_kpi_signals to false. Because this property does not exist by default,

the administrator must add it.

If you reactivate KPI Signals, signal detection resumes from the time you originally deactivated the feature, not from the time you reactivated it.

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/par-for-workspace/concept/process-behavior-charts-for-kpis.html>

Question: 142

What calendar type can you use to analyse scores using time periods?

- A. Team Calendar
- B. Maintenance Calendar
- C. Custom Business Calendar
- D. On-Call Calendar

Answer: C

Explanation:

Analyse scores using time periods from a custom business calendar instead of only the standard calendar.

When you are creating an Indicator Source, you can select either the standard calendar or a business calendar defined on the instance.

If you use a business calendar, you can create data collection jobs that run on the Business Calendar: Entry start or Business Calendar: Entry end times.

If you select a business calendar, you have the Calendar Frequency field. This field is required. The business calendar you selected determines the range of available frequencies.

(Optional) If you have configured this indicator source to use a business calendar, set the number of periods to retain scores and snapshots and find seasonal patterns.

Reference: https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/performance-analytics/concept/c_IndicatorSources.html

Question: 143

What role or access do users need to act on a signal to reset a baseline or dismiss a signal?

- A. Responsible users without workspace access
- B. Users with the admin, pa_admin, or pa_kpi_signal_admin role without being a responsible user
- C. Only users with the admin role
- D. Users irrespective of their level of responsibility

Answer: B

Explanation:

Users with the admin, pa_admin, or pa_kpi_signal_admin role can reset a baseline or dismiss a signal without being a responsible user.

Users with other roles must become responsible users to take such actions. These users also need a role that gives them

access to a relevant workspace.

You can assign responsibility for KPI Signals for a KPI to yourself or someone else. You can also unassign responsibility.

Reference: <https://docs.servicenow.com/bundle/quebec-now-intelligence/page/use/par-for-workspace/concept/kpi-signals-responsible-users.html>

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
