Question: 26

Which autoimmune condition is characterized by the body producing autoantibodies that attack muscle receptor sites, reducing the ability to receive neurotransmitter signals to move properly, thus causing weakness?

- A. Myasthenia gravis
- B. Muscular dystrophy
- C. Muscular degenerative disorder
- D. None of the above

Answer: A

Myasthenia gravis is characterized by the body producing autoantibodies that attack muscle receptor sites of the neurotransmitter acetylcholine, causing an inability to properly pick up signals to function, thus causing weakness.

Question: 27

You are caring for an adult patient who is suspected to have upper neuronal damage. You look for the Babinski sign by stroking the sole of the foot. What would you expect to see?

- A. All toes curl inward
- B. No response
- C. Big toe extends up and the rest fan out
- D. All toes curl upward

Answer: C

In a patient who has upper neuronal damage, a positive Babinski sign is present when the big toe extends and the rest of the toes fan out while the sole of the foot is stroked. A normal or negative sign would be for all toes to curl inward. In children under 2 years of age, the sign is present as the neurologic system matures.

Question: 28

Which of the following are responsible for direct gas exchange with the alveoli?

- A. Veins
- B. Arteries
- C. Capillaries
- D. None of the above

Answer: C

The smallest and thinnest part of the circulation system is the capillaries. The thin nature of capillaries allows the gas exchange with alveoli to occur.

Question: 29

When there is inadequate blood supply to the heart, a patient may experience pain called:

- A. CVA
- B. TIA
- C. Angina
- D. IVC

Answer: C

An inadequate supply of blood to the heart can cause a patient to experience a chest pain called angina. When angina occurs, providers can administer drugs like nitroglycerin, which acts as a vasodilator, enlarging the arteries of the heart to allow for additional blood to flow through them.

Question: 30

Disorders of the nervous system that occur as a result of a cancer or tumor in a different area of the body are known as:

- A. Comorbidity
- B. Secondary neurological disorder
- C. Neuritis
- D. Paraneoplastic syndrome

Answer: D

Some tumors cause an immune response in which the body produces anti-bodies to attack. These anti-bodies often not only attack the tumor, but also attack a portion of the nervous system not related to the tumor. The conditions that result are known as paraneoplastic syndrome and can cause difficulty when diagnosing cancers, as the symptoms are not necessarily located where the tumor is.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
