Question: 61

Topic 1, Litware inc

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model

The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11 AM to 10 PM.

Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment

The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

Department	Windows version	Management platform	Domain-joined
Marketing	8.1	Configuration Manager	Hybrid Azure AD-joined
Research	10	Configuration Manager	Hybrid Azure AD-joined
HR	8.1	Configuration Manager	Hybrid Azure AD-joined
Developers	10	Microsoft Intune	Azure AD-joined
Sales	10	Microsoft Intune	Azure AD-joined

The development department uses projects in Azure DevOps to build applications.

Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to a different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements

Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.
- Re-provisioning the sales department computers is too time consuming.

Requirements

Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers.

Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements

Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.
- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.
- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

Exhibits

Updates

Settings

Windows 10 and later

X

Update settings

Servicing channel	Semi-Annual Channel (Targeted) v
* Microsoft product updates	<div style="display: flex; justify-content: space-around; width: 100%;"> Allow Block </div>
* Windows drivers	<div style="display: flex; justify-content: space-around; width: 100%;"> Allow Block </div>
* Quality update deferral period (days)	7
* Feature update deferral period (days)	14
* Set feature update uninstall period (2 – 60 days)	10

Delivery optimization download mode	Simple download mode with no peering v

OK

HOTSPOT

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

For the Research department employees:

<input type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

For the Sales department employees:

<input type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

Answer:
Answer Area

For the Research department employees:

<input type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection

For the Sales department employees:

<input type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

Question: 62

You implement Boundary1 based on the planned changes.

Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1, Device2, and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

Question: 63

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: From Windows on the Devices blade of the Microsoft Endpoint Manager admin center, you create a filter and export the results as a CSV file.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Question: 64

You need to meet the requirements for the MKG department users.

What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business
- B. Download the APPX file for App1 from Microsoft Store for Business
- C. Add App1 to the private store
- D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business
- E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References: <https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference: <https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

Question: 65

You are creating a device configuration profile in Microsoft Intune.

You need to configure specific OMA-URI settings in the profile.

Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions (Windows 10 Team)
- D. Device restrictions

Answer: B

Explanation:

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/custom-settings-windows-10>

Question: 66

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

A screenshot of a computer

Description automatically generated with medium confidence

Question: 67

HOTSPOT

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains the users shown in the following table.

Name	Role
User1	None
User2	Global administrator
User3	Cloud device administrator
User4	Intune administrator

You configure the following device settings for the tenant:

Users may join devices to Azure AD: User1

Additional local administrators on Azure AD joined devices: None

You install Windows 10 on a computer named Computer1.

You need to identify which users can join Computer1 to adatum.com, and which users will be added to the Administrators group after joining adatum.com.

Which users should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can join Computer1 to adatum.com:

	▼
User1 only	
User1 and User2 only	
User1, User2, and User3 only	
User1, User3, and User 4 only	
User1, User2, User3, and User4	

Users who will be added to the Administrators group after joining adatum.com:

	▼
User1 only	
User2 only	
User1 and User2 only	
User3 and User4 only	
User2, User3, and User4 only	

Answer:

Users who can join Computer1 to adatum.com:

	▼
User1 only	
User1 and User2 only	
User1, User2, and User3 only	
User1, User3, and User 4 only	
User1, User2, User3, and User4	

Users who will be added to the Administrators group after joining adatum.com:

	▼
User1 only	
User2 only	
User1 and User2 only	
User3 and User4 only	
User2, User3, and User4 only	

Question: 68

HOTSPOT

You have computers that run Windows 10 and are configured by using Windows AutoPilot.

A user performs the following tasks on a computer named Computer1:

Creates a VPN connection to the corporate network

Installs a Microsoft Store app named App1

Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

The Wi-Fi connection will be:

Removed
Retained and the passphrase will be retained
Retained but the passphrase will be reset

App1 will be:

Reinstalled at sign-in
Removed
Retained

The VPN connection will be:

Removed
Retained and the credentials will be cached
Retained but the credentials will be reset

Answer:
Answer Area

The Wi-Fi connection will be:

Removed
Retained and the passphrase will be retained
Retained but the passphrase will be reset

App1 will be:

Reinstalled at sign-in
Removed
Retained

The VPN connection will be:

Removed
Retained and the credentials will be cached
Retained but the credentials will be reset

Question: 69

HOTSPOT

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Policy1:

	<input type="checkbox"/>
Device1 only	<input type="checkbox"/>
Device2 only	<input type="checkbox"/>
Device3 only	<input type="checkbox"/>
Device4 only	<input type="checkbox"/>
Device2 and Device3 only	<input type="checkbox"/>
Device1 and Device3 only	<input type="checkbox"/>
Device1, Device2, and Device 3	<input type="checkbox"/>

Policy2:

	<input type="checkbox"/>
Device1 only	<input type="checkbox"/>
Device2 only	<input type="checkbox"/>
Device3 only	<input type="checkbox"/>
Device4 only	<input type="checkbox"/>
Device2 and Device3 only	<input type="checkbox"/>
Device1 and Device3 only	<input type="checkbox"/>
Device1, Device2, and Device 3	<input type="checkbox"/>

Answer:

Answer Area

Policy1:

	<input type="checkbox"/>
Device1 only	<input type="checkbox"/>
Device2 only	<input type="checkbox"/>
Device3 only	<input checked="" type="checkbox"/>
Device4 only	<input type="checkbox"/>
Device2 and Device3 only	<input type="checkbox"/>
Device1 and Device3 only	<input type="checkbox"/>
Device1, Device2, and Device 3	<input type="checkbox"/>

Policy2:

	<input type="checkbox"/>
Device1 only	<input type="checkbox"/>
Device2 only	<input checked="" type="checkbox"/>
Device3 only	<input type="checkbox"/>
Device4 only	<input type="checkbox"/>
Device2 and Device3 only	<input type="checkbox"/>
Device1 and Device3 only	<input type="checkbox"/>
Device1, Device2, and Device 3	<input type="checkbox"/>

Question: 70

HOTSPOT

You have the MDM Security Baseline profile shown in the MDM exhibit. (Click the MDM tab.)

[Home](#) > [Endpoint security](#) > [MDM Security Baseline](#) >

Create profile

Block Office applications from injecting code into other processes ⓘ	Disable	▼
Block Office applications from creating executable content ⓘ	Audit mode	▼
Block all Office applications from creating child processes ⓘ	Audit mode	▼
Block Win32 API calls from Office macro ⓘ	Disable	▼
Block execution of potentially obfuscated scripts (js/vbs/ps) ⓘ	Disable	▼

You have the ASR Endpoint Security profile shown in the ASR exhibit. (Click the ASR tab.)

[Home](#) > [Endpoint security](#) > [ASR Endpoint security](#) >

Edit profile

^ Attack Surface Reduction Rules

Block credential stealing from the Windows local security authority subsystem (lsass.exe) ⓘ	Audit mode	▼
Block Adobe Reader from creating child processes ⓘ	Audit mode	▼
Block Office applications from injecting code into other processes ⓘ	Audit mode	▼
Block Office applications from creating executable content ⓘ	Audit mode	▼
Block all Office applications from creating child processes ⓘ	Audit mode	▼
Block Win32 API calls from Office macro ⓘ	Audit mode	▼

You plan to deploy both profiles to devices enrolled in Microsoft Intune.

You need to identify how the following settings will be configured on the devices:

Block Office applications from creating executable content

Block Win32 API calls from Office macro

Currently, the settings are disabled locally on each device.

What are the effective settings on the devices? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Block Office applications from creating executable content:

Audit mode
Block
Disable
Warn

Block Win32 API calls from Office macro:

Audit mode
Block
Disable
Warn

Answer:

Block Office applications from creating executable content:

Audit mode
Block
Disable
Warn

Block Win32 API calls from Office macro:

Audit mode
Block
Disable
Warn

Explanation:

Box 1: Audit mode

According to the ASR Endpoint Security profile and to the MDM Security Baseline profile, Block Office applications from creating executable content is set to Audit mode.

Box 2: Disable

Block Win32 API calls from Office macro: According to MDM Security Baseline profile it is set to disable. According to the ASR Endpoint Security profile it is set to Audit mode.

The profiles are merged. The Baseline profile overrides the Endpoint Security profile.

Note:

When two or more policies have conflicting settings, the conflicting settings are not added to the combined policy, while settings that don't conflict are added to the superset policy that applies to a device.

Attack surface reduction rule merge behavior is as follows:

Endpoint security > Security baselines > Microsoft Defender for Endpoint Baseline > Attack Surface Reduction Rules.

MDM Security Baseline profile ASR Endpoint Security profile.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
