Question: 844

Which communication method is most effective for sharing real-time updates during interprofessional team meetings?

- A. Written reports
- B. Verbal updates
- C. Email summaries
- D. Social media posts

Answer: B

Explanation: Verbal updates during team meetings allow for immediate feedback and discussion, facilitating effective communication and collaboration among team members.

Question: 845

What is the purpose of the Medicare Home Health Benefit in relation to occupational therapy services?

- A. To provide unlimited coverage for all OT services
- B. To restrict OT services to outpatient settings only
- C. To support clients in their own homes by covering necessary therapy services
- D. To eliminate the need for documentation

Answer: C

Explanation: The Medicare Home Health Benefit allows coverage for necessary therapy services to support clients in their homes, promoting independence.

Question: 846

What is a significant advantage of using visual aids in health education?

- A. They complicate the learning process
- B. They cater to various learning styles and enhance understanding
- C. They replace the need for verbal explanations
- D. They limit client interaction

Answer: B

Explanation: Visual aids cater to various learning styles and enhance understanding, making health information more accessible and engaging for clients.

Question: 847

Which outcome measure is most effective for evaluating a client's readiness to return to work after a stroke?

- A. FIM
- B. Work Environment Impact Scale
- C. Canadian Occupational Performance Measure
- D. Functional Capacity Evaluation (FCE)

Answer: D

Explanation: The Functional Capacity Evaluation assesses an individual's physical and functional capabilities in relation to job demands, making it ideal for evaluating readiness to return to work.

Question: 848

What is the most important consideration for an occupational therapist when working with a client experiencing suicidal ideation?

- A. Discussing the client's past experiences in detail
- B. Encouraging social engagement immediately
- C. Establishing a safety plan with clear coping strategies
- D. Focusing on physical rehabilitation only

Answer: C

Explanation: Establishing a safety plan with clear coping strategies is critical in ensuring the client's immediate safety and providing tools for managing suicidal thoughts.

Question: 849

Which of the following is NOT a requirement for state licensure for occupational therapists in the United States?

- A. Completion of an accredited OT program
- B. Membership in AOTA
- C. Continued education units (CEUs)
- D. Passing the NBCOT certification exam

Answer: B

Explanation: While AOTA membership can be beneficial, it is not a requirement for state licensure.

Question: 850

When assessing a client's occupational engagement, which factor should be considered first?

- A. Medication side effects

- B. Environmental barriers
- C. Client's personal goals
- D. Family dynamics

Answer: C

Explanation: Understanding the client's personal goals is fundamental, as it directly informs the relevance of the assessment and subsequent interventions.

Question: 851

Which biomechanical consideration is vital when fabricating an orthotic device for a patient with arthritis?

- A. Joint immobilization
- B. Weight distribution
- C. Material flexibility
- D. Temperature regulation

Answer: B

Explanation: Weight distribution is crucial to minimize stress on affected joints and enhance comfort for patients with arthritis when using orthotic devices.

Question: 852

Which precaution should an occupational therapist consider when treating a client post-knee surgery?

- A. Monitoring for signs of infection at the surgical site
- B. Encouraging full weight-bearing immediately
- C. Limiting all physical activity
- D. Avoiding any range of motion exercises

Answer: A

Explanation: Monitoring for signs of infection is essential to ensure safe recovery and identify complications early in the rehabilitation process.

Question: 853

In individuals with rheumatoid arthritis, which of the following is a common sign that may limit occupational performance?

- A. Symmetrical joint pain
- B. Increased joint flexibility
- C. Enhanced grip strength
- D. Complete independence

Answer: A

Explanation: Symmetrical joint pain is characteristic of rheumatoid arthritis and can significantly limit an individual's ability to perform daily tasks.

Question: 854

A patient experiences a seizure during a therapy session. What is the first action an occupational therapist should take?

- A. Restrain the patient to prevent injury
- B. Place a spoon in the patient's mouth
- C. Move objects away from the patient
- D. Leave the room to get help

Answer: C

Explanation: Moving objects away from the patient helps prevent injury during a seizure. Restraining or placing objects in the mouth can lead to further harm.

Question: 855

Which of the following is an example of a method to enhance informed decision-making?

- A. Providing a detailed clinical report without explanation
- B. Limiting client involvement in the decision process
- C. Discussing options and encouraging questions
- D. Relying solely on the therapist's recommendations

Answer: C

Explanation: Discussing options and encouraging questions promotes informed decision-making, allowing clients to engage actively in their care.

Question: 856

What client factor is most critical in determining the successful use of assistive technology?

- A. Developmental, physical, and cognitive status
- B. Aesthetic preferences
- C. Cost of the technology
- D. Brand name

Answer: A

Explanation: The individual's developmental, physical, and cognitive status significantly impacts their ability to effectively use and maintain assistive technology.

Question: 857

What is the primary benefit of using a sliding board for transfers?

- A. It eliminates the need for assistance
- B. It reduces the distance of the transfer
- C. It is less costly than other methods
- D. It allows for smoother movement across surfaces

Answer: D

Explanation: A sliding board allows for smoother movement across surfaces, reducing friction and making the transfer easier and safer for the client.

Question: 858

During a therapy session, a client demonstrates increased anxiety when discussing their rehabilitation goals. What is the most appropriate initial response from the occupational therapist?

- A. Encourage the client to express their feelings
- B. Redirect the conversation to physical tasks
- C. Reassure the client that they will improve
- D. Explain the importance of setting goals

Answer: A

Explanation: Allowing the client to express their feelings can help them process their anxiety and can lead to more effective interventions tailored to their emotional needs.

Question: 859

Which of the following is a characteristic of the moderate stage of dementia?

- A. Complete independence in daily activities
- B. Difficulty with recognition and memory
- C. Enhanced problem-solving abilities
- D. Improved physical functioning

Answer: B

Explanation: In the moderate stage of dementia, individuals often experience significant difficulty with recognition and memory, affecting their ability to perform daily tasks.

Question: 860

When fitting a client for a wheelchair, which biomechanical consideration is most important?

- A. The color of the upholstery
- B. The tire size
- C. The manufacturer's brand
- D. The angle of the seat and backrest

Answer: D

Explanation: The angle of the seat and backrest directly affects posture, comfort, and pressure distribution, making it a key biomechanical consideration.

Question: 861

What is a potential consequence of failing to monitor client outcomes effectively?

- A. Improved client satisfaction

- B. Increased therapy duration
- C. Inability to demonstrate therapy effectiveness
- D. Enhanced client engagement

Answer: C

Explanation: Inability to demonstrate therapy effectiveness can lead to questions about the value of the interventions and hinder the justification for ongoing or future therapy services.

Question: 862

Which of the following is a common psychosocial factor that may affect occupational performance in individuals with chronic pain?

- A. Increased social support
- B. Feelings of isolation
- C. Heightened motivation
- D. Improved coping mechanisms

Answer: B

Explanation: Chronic pain often leads to feelings of isolation, which can significantly hinder an individual's ability to engage in social and occupational activities.

Question: 863

Which aspect of ergonomics focuses on the interaction between people and the systems they use?

- A. Task analysis

- B. Environmental design
- C. Cognitive ergonomics
- D. Physical ergonomics

Answer: C

Explanation: Cognitive ergonomics studies how people interact with systems, including the mental processes involved, which is vital for designing effective work environments.

Question: 864

Which of the following should an occupational therapist consider when adapting an intervention plan for a client who has experienced a traumatic brain injury?

- A. The client's physical therapy goals
- B. The client's pre-injury occupational roles
- C. The client's nutritional needs
- D. The client's family history of neurological disorders

Answer: B

Explanation: Understanding the client's pre-injury roles allows the therapist to tailor interventions that are meaningful and relevant to the client's life, promoting better engagement and outcomes.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
