Question: 72

A developer considers the following snippet of code:

```
Boolean isOK;  
integer x;  
String theString = 'Hello';  
  
if (isOK == false && theString == 'Hello'){  
    x = 1;  
} else if (isOK == true && theString == 'Hello'){  
    x = 2;  
} else if (isOK != null && theString == 'Hello'){  
    x = 3;  
} else {  
    x = 4;  
}
```

Based on this code, what is the value of x?

- A. 2
- B. 1
- C. 3
- D. 4

Answer: D

Question: 73

Since Aura application events follow the traditional publish-subscribe model, which method is used to fire an event?

- A. ermit()
- B. fireEvent()
- C. fire()
- D. registerEvent()

Answer: C

Question: 74

Universal Containers has created a unique process for tracking container repairs. A custom field, status__c, has been created within the container__c custom object. A developer is tasked with sending notifications to multiple external systems every time the value of the status__c picklist changes.

Which two tools should the developer use to meet the business requirement and ensure low maintenance of the solution? Choose 2 answers

- A. Record-Triggered flow
- B. Apex trigger
- C. Apex callouts
- D. Platform event

Answer: C, D

Question: 75

An org tracks customer orders on an Order object and the items of an Order on the Line Item object. The Line Item object has a MasterDetail relationship to the order object. A developer has a requirement to calculate the order amount on an Order and the line amount on each Line item based on quantity and price.

What is the correct implementation?

- A. Implement the line amount as a numeric formula field and the order amount as a roll-up summary field.
- B. Write a single before trigger on the Line Item that calculates the item amount and updates the order amount on the Order.
- C. Implement the Line amount as a currency field and the order amount as a SUM formula field.
- D. Write a process on the Line item that calculates the item amount and order amount and updates the field on the Line Item and the order.

Answer: C

Question: 76

A developer must create an Apex class, contactcontroller, that a Lightning component can use to search for Contact records. User of the Lightning component should only be able to search Contact records to which they have access.

Which two will restrict the records correctly?

- A. public class ContactController
- B. public with sharing class ContactController
- C. public without sharing class ContactController
- D. public inherited sharing class ContactController

Answer: B, D

Question: 77

A Licensed_Professional__c custom object exist in the system with two Master-Detail fields for the following objects: Certification__c and Contact. Users with the "Certification Representative" role can access the Certification records they own and view the related Licensed Professionals records, however users with the "Salesforce representative" role

report they cannot view any Licensed professional records even though they own the associated Contact record.

What are two likely causes of users in the "Sales Representative" role not being able to access the Licensed Professional records? Choose 2 answers

- A. The organization's sharing rules for Licensed_Professional__c have not finished their recalculation process.
- B. The organization recently modified the Sales representative role to restrict Read/Write access to Licensed_Professional__c
- C. The organization has a private sharing model for Certification__c, and Contact is the primary relationship in the Licensed_Professional__c object
- D. The organization has a private sharing model for Certification__c, and Certification__c is the primary relationship in the Licensed_Professional__c object.

Answer: A,D

Question: 78

Universal Containers wants Opportunities to no longer be editable when reaching the Closed/Won stage.

How should a developer accomplish this?

- A. Use a validation rule.
- B. Use the Process Automation settings.
- C. Use Flow Builder.
- D. Mark fields as read-only on the page layout.

Answer: A

Question: 79

A third-party vendor created an unmanaged Lightning web component. The Salesforce Administrator wishes to expose the component only on Record Page Layouts.

Which two actions should the developer take to accomplish this business objective? Choose 2 answers

- A. Specify lightningCommunity_Page as a target in the XML file.
- B. Ensure isExposed is set to true on the XML file.
- C. Specify lightningCommunity_Page_Layout as a target in the XML file.
- D. Specify lightning_RecordPage as a target in the XML file.

Answer: B,D

Question: 80

How should the code be altered to help debug the issue?

- A. Add a System.debug() statement before the insert method
- B. Add a try/catch around the insert method
- C. Set the second insert method parameter to TRUE

D. Collect the insert method return value a Saveresult variable

Answer: B

Question: 81

Which three statements are accurate about debug logs? Choose 3 answers

- A. Amount of information logged in the debug log can be controlled programmatically.
- B. Debug Log levels are cumulative, where FINE log level includes all events logged at the DEBUG, INFO, WARN, and ERROR levels.
- C. Amount of information logged in the debug log can be controlled by the log levels.
- D. To View Debug Logs, "Manager Users" or "View All Data" permission is needed.
- E. To View Debug Logs, "Manager Users" or "Modify All Data" permission is needed.

Answer: A, C

Question: 82

A developer receives an error when trying to call a global server-side method using the @remoteAction decorator. How can the developer resolve the error?

- A. Change the function signature to be private static.
- B. Add static to the server-side method signature.
- C. A Decorate the server-side method with (static=true).
- D. Decorate the server-side method with (static=false).

Answer: B

Question: 83

A developer creates a Lightning web component that imports a method within an Apex class. When a Validate button is pressed, the method runs to execute complex validations.

In this implementation scenario, which artifact is part of the Controller according to the MVC architecture?

- A. HTML file
- B. JavaScript file
- C. XML file
- D. Apex class

Answer: D

Question: 84

A developer must build application that tracks which Accounts have purchase specific pieces of equal products. Each Account could purchase many pieces of equipment.

How should the developer track that an Account has purchased a piece of equipment.

- A. Use the Asset object.
- B. Use a Custom object.
- C. Use a Master-Detail on Product to Account
- D. Use a Lookup on Account to product.

Answer: C

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
