## Question: 124

Your published layout.cshtml file contains a static placeholder with a `main` placeholder key and you want to add renderings to the presentation details of a templates standard values; however you cannot see the "main" placeholder key you added to the layout. Of the available options, which is the best explanation of what happened?

- A. There is a missing configuration element in web.config for placeholders.
- B. The wrong layout is associated with the current template.
- C. A Sitecore publish is required to show placeholder keys when editing presentation details.
- D. There is no placeholder settings item for the associated "main" placeholder key.

Answer: D

## Question: 125

As you create templates and add standard values, you knowitems created from the templates should automatically have the Title field populated with the name of the item.

What should you do to ensure this occurs?

- A. Add `$name` token to the template's standard values Title field.
- B. Set `$name` token in the newitem's content Title field.
- C. Set `_name` token in the new item's content Title field.
- D. Add `_name` token to the template's standard values Title field.

Answer: A

## Question: 127

While using the Sitecore Install Assistant (SIA), you encounter the error below:

The screenshot shows the Sitecore Install Assistant (SIA) interface. The left sidebar contains a navigation menu with items: Welcome, Prerequisites, Install Solr, Sitecore settings, SQL Server settings, Solr settings, Optional modules, Summary, Validate, and Install. The main content area is titled "Install" and shows "Installing Sitecore with the settings you defined." Below this, a red bar indicates "The installation failed" with the message "An error has occurred. For more information, see the log file." The "Installation Status" section shows a log of errors. The error message is: "[Error]: Unable to parse [variable('XConnectSolr\_Core.Root')] - Exception calling 'Evaluate' with '2' argument(s): 'The running command stopped because the preference variable 'ErrorActionPreference' or common parameter is set to Stop: Unable to parse [joinpath(variable('XConnectSolr\_Solr.Server'), variable('XConnectSolr\_Xdb.Name'))] - Exception calling 'Evaluate' with '2' argument(s): 'The running command stopped because the preference variable 'ErrorActionPreference' or common parameter is set to Stop: Unable to parse [joinpath(variable('XConnectSolr\_Solr.FullRoot'), 'server', 'solr')] - Exception calling 'Evaluate' with '2' argument(s): 'The running command stopped because the preference variable 'ErrorActionPreference' or common parameter is set to Stop: Unable to parse [resolvepath(parameter('XConnectSolr\_SolrRoot'))] - Exception calling 'InvokeWithContext' with '2' argument(s): 'The running command stopped because the preference variable 'ErrorActionPreference' or common parameter is set to Stop: Cannot find path 'C:\Solr\Solr-8.4.0' because it does not exist.'''".

Based on the information provided in the image, what is the most likely reason for this install error?

- A. The Sitecore instance username/password were incorrect.
- B. The Solr install path was set incorrectly.
- C. The Solr service was stopped.
- D. The SQL server username/password were incorrect.

**Answer: B**

With Sitecore MVC, how do you ensure a field cannot be edited when you use the field helper to render content?

- A. Use then on-editable equivalent field type.
- B. Use the DisableWebEdit option.
- C. Set the editable parameter to "false".
- D. Mark the field as non-editable in the field definition item.

**Answer: B**

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

## Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

## Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

## Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

## Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

## Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
